

Indigenous vs Aliens

Seville, Spain

The multimedia show designed and produced by ACCIONA Producciones y Diseño for the new 2013 summer season of the Lake of Isla Magica Theme Park, combines a wide display of mediums and special effects: video mapping over new scenographic elements, water cannons in sync with music, cybernetic illuminated fountains, fireworks, flamethrowers, among others.

The staging is highlighted by the technique of 3D mapping projection over a moving element, in this case a boat, to narrate the arrival of the conquerors of the New World to America in the 16th century who are perceived as aliens by the natives.

The show is projected over a screen 12 meters long and 6 meters wide, using 4 video projectors with a total of 88,000 lumens.
