

Islazul

Madrid, Spain

Islazul is a commercial and leisure center that stands out for its harmonious design, inspired in water and nature. Its space, based on suggestively curved lines, insinuate the waves of this singular urban island. Thanks to its transparent cover that lets in natural light, the building transmits to the visitor the sensation of being outdoors.

Date:
2008

Client:
Grupo Lar Agente Urbanizador, S.L.

Located in Madrid, the center measures 256,000 m² of constructed surface area distributed on two floors in which special care is taken in the decoration and landscaping. Elements of gardening and water, sinuous benches, gigantic lamps formed by hundreds of hanging plants, pergolas, kiosks, children's games and LED screens create a dynamic and attractive walk through the malls which culminates in the Plaza Islazul where an island covered in vegetation with surprising detail sums up the spirit of the center.

ACCIONA Producciones y Diseño carried out the design, production and mounting of the decorative elements, the furniture and the lamps that integrate the common areas of the commercial center: the malls of the supermarket, clothes shops, play area, accesses, rest areas, the Plaza Islazul and the exterior totem.
